EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert S. Blasi (Reg. No. 50,389) on 4 December 2008.

2. The application has been amended as follows:

1. (Amended): A method comprising:

identifying, by a processor, a first license associated with a first protectable content;

associating, by a processor, a portion of a plurality of license attributes with the first license;

assigning, by a processor, a restriction value to each of the associated license attributes, the restriction values of the associated license attributes specifying particular restrictions pertaining to the first protectable content;

assigning, by a processor, at least one use value and at least one interaction value to a portion of the associated license attributes, the at least one use value representing a degree of distribution of the first protectable content and the at least one interaction value representing a degree of manipulation of the first protectable content;

comparing, by a processor, the assigned restriction, use, and interaction values of the at least some of the associated license attributes with corresponding attribute values associated with a second license, the second license being associated with a second protectable content;

detecting, by a processor, whether an event occurred associated with the comparison, wherein the event is at least one of an incompatibility, an error, and a warning;

responsive to the comparison and the event detection, determining, by ~~the~~ a processor, license attributes associated with a third protectable content, the third protectable content comprising a portion of the first protectable content and a portion of the second protectable content; and

storing in a computer readable memory the determined license attributes associated with the third protectable content;

wherein each processor is implemented in a digital data processing device.

3. The following is an examiner's statement of reasons for allowance:
4. The present invention is directed to a method of resolving dependencies for aggregations of legally-protectable content. The method includes comparing the assigned restriction, use, and interaction values of a first license associated with a first protectable content with corresponding attribute values associated with a second license, the second license being associated with a second protectable content, then,

Art Unit: 3685

based on that comparison, detecting whether an event occurred associated with the comparison, the event being at least one of an incompatibility, an error, and a warning.

Further, determining, based on that comparison, attributes associated with a third protectable content, the third protectable content being at least partly based on a combination of at least some aspects of the first and second protectable content.

Licenses associated with content containing attributes defining restrictions and usage rights are well known (See, for example, Ginter, et al. (US Patent No. 5,892,900), Figures **17-21**, Col. **137**, Il. **23-35**; Col. **139**, I. **65** to Col. **140**, I. **10**; Col. **140**, I. **62** to Col. **141**, I. **3**; Col **155**, I. **38** to Col. **156**, I. **28**; Col. **156**, I. **48** to Col. **157**, I. **32**).

5. The closest prior art of Ginter further discloses a chain of control that specifies the rights of users to modify, add, or delete content (Col. **286**, Il. **7-48**; Col. **287**, Il. **24-27**) as well as embedding content containers within other content containers (Col. **322**, I. **30** to Col. **325**, I. **22**). Ginter discloses creating control information for the combined object that consists of the control information of the parent object and for the combined object (Col. **322**, Il. **55-63**; Col. **324**, Il. **54-59**; Col. **325**, Il. **54-58, 61-66**). However, with regard to claim 1, the prior art fails to teach or reasonably suggest singly or in combination "responsive to the comparison and the event detection, determining, by a processor, license attributes associated with a third protectable content, the third protectable content comprising a portion of the first protectable content and a portion of the second protectable content."

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3685

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
